# PRESS RELEASE

## ***EBAA Iron Expands Pipe Size Range of the MEGA-COUPLING®***

**Large diameter sizes 14 inch through 36 inch are now available.**

*Eastland, Texas – May 30, 2013* – EBAA Iron, Inc. has expanded the available sizes of their MEGA-COUPLING Restrained Coupling to include nominal pipe sizes 14 inch through 36 inch.

The MEGA-COUPLING Series 3800 Restrained Coupling by EBAA is designed and manufactured to economically and efficiently couple and restrain similar or dissimilar pipe materials without the need for a standalone coupling and a separate restraint harness. The MEGA-COUPLING utilizes a unique coupling body to easily couple two plain ends of pipe and restrain them with two “time proven” MEGALUG® Restraints.

The 4 inch through 12 inch size range has for years successfully restrained: Ductile Iron Pipe (DIP), C900 PVC Pipe, ASTM 2241 PVC Pipe (IPS), Carbon Steel Pipe, HDPE Pipe or any combination thereof. EBAA has now expanded their size range to include 14 inch through 36 inch for Ductile Iron Pipe, C905 PVC Pipe or both.

See the new sizes at EBAA’s booth (# 4001) at this year’s AWWA ACE’ 13 in Denver, CO June 9<sup>th</sup> through the 12<sup>th</sup>. Contact an EBAA Representative near you for additional information or call EBAA at 800.433.1716. All of these enhancements are reflected in EBAA Iron’s latest MEGA-COUPLING Product Brochure found at [www.ebaa.com](http://www.ebaa.com).

As with all of EBAA’s restraints the MEGA-COUPLING is Made In USA.
